Aditi Navhal

Forward Deployed Engineer · Full Stack Development · Enterprise Integrations · GenAI · Client-Facing
Delhi NCR, India (Gurgaon accessible) | aditinavhal01@gmail.com | +91-8769589069 | LinkedIn: Aditi Navhal | Portfolio

Summary

Full stack engineer who works at the **client end of the platform**: embeds with **enterprise** stakeholders, maps **complex business processes, legacy systems and integration needs**, then **designs, builds and deploys** the solution. 3+ years across **product ownership and hands-on full stack development** in **React.js, JavaScript and TypeScript** with **C#/.NET** services. Builds **API integrations, data pipelines** and **low-code, configuration-driven tooling**, including a connector that pulled a **legacy on-premise system** into cloud **workflows**. Ships **GenAI and LLM** features into live products. **Prototypes and iterates fast** while delivering **production-grade** software with a high degree of **ownership**, and has been **client-facing since 2023** with **enterprise** customers including **PwC** and Aurelius Capital Management.

Experience

Product Manager (Client Project), UrjaSetu BioEnergy — Sep 2026 – Present
Delhi NCR, India

- **Embedded with a client** to take a **0-to-1** platform from **discovery to production**: ran stakeholder discovery into their **business process**, authored the **PRDs and BRDs**, owned the roadmap, and worked daily with a **2-person engineering team**.
- **Designed and built** a quote **workflow** over a complex offline purchasing process: a 4-question Fuel Finder, a fuel-switch calculator and a supplier checklist feeding a context-prefilled inquiry form, targeting 12 NCR industrial hubs.
- **Prototyped, shipped and iterated**: delivered the first version for client review, incorporated their feedback directly, and the client now demonstrates it to existing buyers ahead of an IndiaMART and Google launch.
- Specified **15+ analytics events** across quotes, recommendations, calculator use and contacts, and built **market-sizing and unit-economics** models to inform pricing.

Software Engineer (Product Ownership), WFYI Technology – FylFlix — Jan 2026 – Aug 2026
Delhi NCR, India

- **Owned product and full stack engineering** across four surfaces of a multi-vertical **SaaS** platform (legal, tax, finance, admin): defined customer journeys for four user segments, authored **PRDs and BRDs**, and led a **5 to 7 person cross-functional team**. Reached **500+ ITR sign-ups** in one filing season and **12 business clients**.
- Built an internal **low-code, configuration-driven template** replacing per-page development, launching **180+ service pages** and letting non-engineers add new ones **without further engineering work**, then turned it into a reusable **accelerator** for the team.
- Built the **Tally Connector**, an **integration** pulling a **legacy on-premise accounting system** (26 TallyPrime entities) into cloud storage and PostgreSQL **data workflows** with delta sync and **idempotent writes**, reaching **20 installs in its first week**.
- Shipped **GenAI / LLM-powered product features** (prompt design, model **API integration**, fallback handling) and built **100+ REST API integrations** behind monetization **workflows**, in **React.js, Next.js and TypeScript**.

Software Engineer, Indus Valley Partners (IVP) *(Promoted from Associate Software Engineer)* — Jul 2023 – Dec 2025
Mumbai, Maharashtra

- **Client-facing with Aurelius Capital Management** on **enterprise** reconciliation **workflows**, translating **business requirements** and operational issues into product improvements, with delivery for **PwC** and Carronade Capital.
- **Led a 3 to 4 person team** migrating an **enterprise legacy system** from **.NET Framework to .NET Core**, delivering **10+ production features**, a **30%** performance gain and **25%** faster release cycles.
- Built **data pipelines** and reporting: automated **100+ financial and compliance reports** with SSRS and **SSIS ETL**, cutting a key **workflow** from approximately **6 hours to 2 hours**.

Skills

Full Stack Development: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS; C#, .NET Core, REST API Design, Microservices, OOP, Design Patterns
Integrations & Data: API Integrations, Enterprise & Legacy System Integration, On-Premise to Cloud Connectors, Data Pipelines, ETL (SSIS), Delta Sync & Idempotency, SQL Server, PostgreSQL, MySQL, SQLite, JSON, XML
GenAI: LLM API Integration, Prompt Engineering, Model Fallback Handling, AI-Assisted Development (GitHub Copilot, Claude)
Solution Delivery: Client-Facing Solutioning, Business Process Mapping, Requirements Gathering, Legacy System Assessment, Rapid Prototyping, Low-Code & Configuration-Driven Tooling, Accelerators & Templates, Production-Grade Delivery
Product: Discovery, Customer Journey Design, PRDs & BRDs, MVP Definition, Roadmapping, Prioritization, User Segmentation, Stakeholder Management
Analytics: SQL, Funnel Analysis, Event Tracking & Instrumentation, Product Metrics, Unit Economics, Market Sizing
Delivery: Agile/Scrum, Git & GitHub, CI/CD Pipelines, Docker, AWS, Enterprise SaaS, Cross-Functional Team Leadership

Education

Mukesh Patel School of Technology Management & Engineering (NMIMS) — 2019 – 2023
B.Tech in Information Technology – CGPA: **3.99/4.00** | **Ranked #1 in Program**
Leadership: Led the Atrangi Art Committee, Ambiora Tech Fest and the cultural fest, NMIMS; State-level Badminton Player.
